

# ATB-Plus

The versatile solar attachment bracket

The **fully adjustable solar solution** for trapezoidal sheet profiles.

**EJOT ATB-Plus** is possibly the most versatile fixing solution that is suitable for all popular trapezoidal sheet profiles - with or without intermediate insulation.

**EJOT ATB-Plus** has a base attachment that is fully adjustable and offers and multiple solar module options accommodating varying widths and heights. Installation is quick and clean - **ATB-Plus** comes with ready applied, self-adhesive EPDM sealant to ensure quick installation and a weather-proof fit.

Mounting is directly onto the crown of the panel, across the profile - just wipe away excess oil and debris, align, and apply. Fixing is through prepunched holes, using **EJOT JF3 EJOFAST** screws.

**EJOT ATB-Plus** provides a solar attachment solution that is cost-effective, quick to install, and spares the and minimizes the threat of cold-bridging!

#### **ATB - at a glance:**

- Fully adjustable
- Fits all trapezoidal sheets
- Suits multiple solar modules
- Quick to install
- Mounts directly to crown
- Eliminates cold bridging

# ATB-Plus

The versatile solar attachment bracket

Multiple attachment options...  
a variety of solutions!

Manufactured from A2 stainless steel, the EJOT ATB-Plus is compatible with most common metal roofing materials. An integral EPDM adhesive rubber sealant on the base ensures quick weather-proof installation.

We provide modular attachments to provide height adjustment as well as vertical or horizontal bracket positioning. All four pre-punched holes must be used to achieve tested strength.

EJOT ATB-Plus is mounted directly onto the crown of the panel, straddling the profile. Simply wipe away excess oil and debris, align, and position. Secure using the appropriate EJOT JF3 fasteners or Bulb-tite rivets for the supporting roof material.

#### Quick and easy to install:

- Clean surface
- Position bracket
- Remove EPDM strips
- Secure with JF3-2-5.5 x 25 E16
