

X PLATE

The quick & slick solution for KINGSPAN Envirodek® and Topspan panels

Simple, one washer for two fasteners, for a quicker installation, reducing cost. More consistent and secure fixing.

The Solution

X Plate fastens closer together 30mm rather than 40mm

For faster installation, one X Plate washer positions the fasteners at 30mm centres to aid installation into a 40mm wide Profile.

Positioning the fasteners with X Plate ensures the fasteners pass all the way through the crown, achieving a more secure fix.

- XPlate's centering marks line up with correct fixing position (the top groove) on Envirodek®/Topspan panels.
- Suitable for standard hexagon headed self-tapping fasteners to accommodate thicker hot rolled steel rafters.
